

Birmingham July 20 1844

My Dear Dr. Bray

I just wonder
that after all your coaching
and my asking myself, "What
harm if the leaf of *Dionaea* did
take a small insect?" that I
was such a brute that I could not
"see it". ~~My~~ ^{My} explanation.

All the discovery is "real
Darwinism" - The power I like
to think of as originating higher;
and these revelations don't ~~do~~
shake my faith, but cause me
to wonder and glory all the more
in the Great Power, all whose
works praise Him - whether directly
created or "evolved".
